Section 1: Executive Summary & Key Performance Indicators Dashboard
Key Performance Successes

1. Q4 2016 has been a period of stability for key internal process control indicators. IT systems and web availability has been maintained, no serious data breaches have been made and there were fewer than budgeted external legal referrals (Section 1.2 – ‘Internal Process’).

2. There has been a significant improvement in Interim Orders Committee (IOC) hearing timeliness during Q4 (See section 1.2 – ‘Timeliness’). The target to hold IOC hearings within 21 working days of referral was met in 98% of cases: a 50% improvement on Q3. IOC timeliness is a key focus in the effort to regain PSA standard 4.

3. The two Registration application routes regarded as ‘key’ for this period of the year both met active processing time targets (See section 1.2  – Timeliness). This is part of a wider improvement in Registration application processing times during Q4 with several routes being the quickest this year (See annex A – Section 4.1).

4. Internal and external customer feedback in several parts of the organisation indicated positive performance in Q4:
   - Internal: IT Customer Service (98% - annex A, 1.4), Governance Papers (87% - A, 2.4), PMO engagement (100% - A, 4.4)

Key Performance Issues

1. Timeliness in the processing of FTP cases continues to be recognised as a priority for improvement. The organisation’s two key FTP performance indicators are both flagged as red for Q4 (see section 1.2 – ‘Timeliness’). A number of other indicators are flagged as red in the FTP process dashboard (Annex A, 2.1).

2. Full year 2016 FTP spending is £2.9m higher than budget, following the need to allocate more Prosecution referrals to external providers than budgeted during 2016. The impact of this has been partially offset by a reduction in spending in other parts of the organisation (£1.9m lower than budget). (see section 1.2 – ‘financial’)

3. The level of natural organisational turnover and employee sickness reduced (see section 1.3 – ‘Resources’) from Q3 levels but both remain amber and above desirable levels. The reasons behind turnover continue to be monitored by the HR team and training for managers in key HR policies and procedures is planned throughout 2017, which will include sickness management.

Looking Forward

1. In March, the FTP budget model will be reviewed to consider if a reforecast is needed. Focus will be on on incoming case levels (which have been on a downward trend since Q3 2016) and Case Examiner activity (which requires close monitoring to check whether budget assumptions about volumes of warnings and undertakings in the new process prove to be accurate).

2. Q1 2017 will be a seasonally busy period for a number of parts of the organisation. In Registration: 2016 Dentist ARF period close-out and subsequent restoration peak. In FTP: Levels of FTP case receipt in Q1 are typically a seasonal highpoint. In Finance: Year end financial activity will take place during Q1 and work will commence on the annual report and accounts.

3. Projects are being delivered as part of the 2017 business plan in Q1 that are linked to a number of performance indicators. The new Finance database system will go live at the start of January, the launch of the new public website will take place in February and training in recruitment and core management processes will be carried out on an ongoing basis in 2017.

Actions Planned by EMT

1. EMT will continue to prioritise management activity in 2017 will focus on the improvement of FTP timeliness. Oversight of FTP management activity will support the improvement of indicators (a current summary of actions is provided at annex A, section 2). The end to end process review in 2017 will focus on amending aspects of the process that currently cause delays.

2. As a further measure to focus on EMT level management of FTP timeliness, FTP Heads of Department will be invited to each EMT meeting to discuss the balanced scorecard and provide the board with further insight on improvement plans relating to specific performance indicators.

3. EMT will prioritise cost control in 2017 to avoid any repeat of the 2016 budget overspend; EMT are discussing cost control at each meeting, processes for ensuring that external legal referrals are kept to a minimum have been introduced, and; the FTP rolling forecast model will help to give early sight of any trends that may drive cost. Work is progressing on the public fees consultation which will go-live at the end of Q2.
This indicator is a combined metric that depends on performance throughout the entire year.

In Q4, average staff sickness levels reduced from the previous period, which is due to higher than expected cases being referred to external legal providers in 2015 and early 2016, and professional fees paid for external legal casework support (Capsticks) in 2016.

During Q4, only 11 external referrals were made compared to the budgeted level of 21.

As well as improvements to the capability of the internal legal team to keep cases in-house, this indicator is also affected by the flow of cases coming through from Case Examiners, which was lower than expected in the first two months of the process in Q4.

This indicator is a combined metric that depends on performance throughout the entire year.

During Q4, only 11 external referrals were made compared to the budgeted level of 21.

As well as improvements to the capability of the internal legal team to keep cases in-house, this indicator is also affected by the flow of cases coming through from Case Examiners, which was lower than expected in the first two months of the process in Q4.
During Q1 2017, an exercise is planned to cross-reference the new balanced scorecard indicators with current live risks on the strategic risk register. Balanced scorecard indicators are likely to be mapped to the ‘current mitigation’ and ‘monitoring method’ sections of several live risks, and will be referenced in this section of the scorecard in future versions. Current strategic risks (with risk reference numbers noted) that will be likely be cross-referenced with balanced scorecard measures are:

- **FP5** - More cases passed to ELPS than budgeted causing overspend
- **FP6** - Failure to meet FTP PSA standards
- **FC4** - We fail to continuously identify and implement cost efficiency measures
- **HR1** - Poor line management performance
- **CP1** - A breach in data security leads to potential legal sanctions, undertakings, financial penalty and loss of public confidence
- **CP3** - Failure to learn the lessons from the PSA Investigation Report leads to GDC poor performance

As the business plan is implemented throughout 2017, links will be made to key initiatives and any expected impact on scorecard performance indicators. Links will be made each month to expected benefits from investment in business plan initiatives. In summary:

- The new finance database system will be effective from the start of January (Relevant indicators - Annex A, 1.1/1.2)
- The launch of the new public website will take place in February (Relevant indicator - Annex A, 1.3)
- The Data Management project will aim to improve timeliness in information governance while establishing an overall information governance framework (Relevant indicators – Annex A, 2.6)
- Training in recruitment and core management processes will be carried out on an ongoing basis (Relevant indicators - Annex A, 3.1/3.2)
- The Communications and Engagement Strategy is in the second year of implementation with further activities planned to embed the improvements made in 2016 (Relevant indicators – Annex A, 5.2)
- A new risk-based approach to Education and QA will be embedded in 2017 (Relevant indicator – Annex A, 5.3)
- The Standards will continue to be embedded throughout 2017 (Relevant indicator – Annex A, 5.4)
- A number of activities will be centred around improving FTP timeliness (Relevant indicators – Annex A 2.2 and Timeliness KPIs)

There are also a number of initiatives from the 2015 OCP and 2016 Business Plan that will be linked to the scorecard, as benefits are tracked after project completion:

- Leadership and Development Programme will be assessed including 360° feedback evidence (Relevant indicator – Annex A, 3.1)

- Facilities Team ensure that lifts are available and reliable. Staff and visitors rely on the lifts to get to upper floors. Some staff have problems using the stairs and rely on lifts for building accessibility. The planned launch of the customer service survey has been deferred until Q2 2017 in order to join up with the planned launch of an HR led customer service survey. This consolidated approach was discussed and approved with EMT during Q4 2016.

- The proportion of time that one or more of the Wimpole Street lifts are recognised to be out of service.

- The main lift was reliable throughout Q4, however, a significant issue arose with the rear Mews lift which developed a fault that proved difficult to diagnose. This issue is now substantively resolved, however, 20 hours of outage were incurred during the period that the issue was live.

SUPPLEMENTARY INSIGHTS ON SECTION 2.2 – FTP PERFORMANCE INDICATORS DASHBOARD

Timeliness in the processing of FTP cases continues to be recognised as a priority area for improvement. The organisation’s two key performance indicators are both flagged as red for Q4 (see section 1.3 at the top of the report – ‘Timeliness’).

Several other indicators are flagged as red in the FTP process dashboard (Annex A, 2.1, overleaf). The improvement of timeliness in FTP will be a medium to long term challenge due to the length of the process and therefore the length of time needed for aged cases to move through to completion in order for indicators to improve. In designing the new indicators, the FTP management team has sought to break down the overall 15 month target into a number of component parts, thereby providing the clearest possible view of where aged cases exist in the system. It is expected for a number of indicators to remain red in the early versions of this report. Management activity in 2017 will focus on timeliness improvement, supported by activity this year following an FTP end-to-end review.

A summary relating to supportive indicators is noted below:

• PI/FTP/001 - Work is being carried out to strengthen Triage team resilience – an additional Senior Triage Officer is being recruited in Q1 (with headcount moved from Assessment team allocation) which will bring the team up to a fully resourced position.
• PI/FTP/002 – There are a large number of aged cases already beyond the 17 week timeframe at this stage of the process. Ongoing focus on case plans and 1:1 review of case progression with a focus on moving the oldest cases out of the stage.
• PI/FTP/002 & 004 – Q4 was the go-live period for the launch of Case Examiners, with new processes being embedded. Timeliness is expected to improve as experience of operating the new processes increases.
• PI/FTP/004 – A more robust approach is being introduced in January to seek to limit extensions to case observation deadlines to a minimum with planned communication to defence organisations to this effect.
• PI/FTP/010, PI/FTP/007, PI/FTP/012 – Targeted activity is being carried out to improve timeliness in the later stages of the case management process. The internal legal team has adopted a new time recording system which will help accurately monitor capacity and ensure work is being done at the right level. The team also continue to work towards reaching disclosure within 98 days, using clear task and deadline tracking as well as mid-point reviews to ensure cases are progressing on time. Ongoing improvements to the hearings case management process also seek to reduce the time taken to reach a hearing and a reduce in hearings that are adjourned part-heard.
• PI/FTP/012 – The proportion of productive hearings days within the period was affected by train strikes which prevented panel members attending hearings on approximately 10 working days in total, as well as several cases which were adjourned part-heard.

<td>THIS PERIOD: £1,900 Average Cost</td>
<td>At £1900, the average recruitment campaign cost for Q4 was below the within the allocated level of £2500 per recruitment. However, the average cost increased from the Q3 level of £1359. This can be attributed to the fact that during Q3 the majority of posts recruited to came via internal recruitment or applications direct to the GDC website (rather than through recruitment agencies. Conversely, recruitment during Q4 included appointments at ‘head of’ level which incurred executive search fees, contributing to the higher average.</td>

The remuneration Committee have steered the development of this indicator with data to be reported on this indicator following their approval at the end of 2016. Following pilot sessions in late 2016, recruitment and selection training has now been provided for all new GDC managers as part of their induction from January 2017 onwards. Training sessions will also be offered to all existing GDC managers. It is hoped that this training will bring about an improvement in candidate selection, which should serve to improve the performance of this indicator.</td>

**CORPORATE STRATEGY LINK**
Performance Objective 1: Effective management of staff

**DESIRED OUTCOME**
For levels of employee sickness to be in line with benchmarked national average to help support productivity in line with planned levels

**PERFORMANCE INSIGHTS:**
- The average number of sickness days per staff member reduced during Q4, but remains at amber, about the target level of under two days average.
- This can mainly be attributed to reductions in the number of employees who took long term sick leave (15 in Q3 compared to 12 in Q4).
- Training for managers in key HR policies and procedures is planned throughout 2017, which will include sickness management.

More time was spent developing the 2017 schedule to minimise inconsistencies. • Council receives horizon scanning reports which must be up to date. As a result this paper is sent out “to follow”. <td>Q4 for was the first quarter of 2016 where both the overall and active processing time indicators were met. Partly due to the seasonally low volume of applications arriving for processing, the average of four calendar days for ‘active processing time’ is the quickest average of 2016.</td>

<td>20</td>
<td>99</td>
<td>The route has not met its ‘overall processing time’ indicator in 2016. However, the ‘active processing time’ KPI has been met consistently in 2016. The difference in the two indicators demonstrates that this route is particularly prone to time being taken to chase and receive applicant information.</td>
</tr>
<tr>

<td>117</td>
<td>93</td>
<td>23</td>
<td>With an average of 16 and 12 calendar days respectively, this is the quickest quarter of 2016 for both performance indicators. 93 completed applications is a 121% increase in comparison to Q3 and takes the yearly total to 314.</td>
</tr>
</tbody>
</table>

### D. Insights

- The processing rate is the critical KPI to manage effectively. The ‘active processing time’ KPI should be managed and monitored more closely than the ‘overall processing time’ KPI. The ‘active processing time’ KPI is the key driver of the ‘overall processing time’ KPI. The ‘active processing time’ KPI should be managed to keep below 7 calendar days to ensure the ‘overall processing time’ KPI is managed to below 14 calendar days.

**DESIRED OUTCOME:**
Applications to join the register are accurately assessed within the correct outcome made in a timely fashion to provide a prompt outcome for the applicant in line with the internally set service level agreement.

**Performance Objective 1 & 2:** Highly effective regulator and management of resources.
**PI/REG/015 – Call Centre Availability**

**PERFORMANCE INDICATOR:**

The proportion of inbound calls from members of the public that are answered by the Customer Service and Information team.

**CORPORATE STRATEGY LINK**

Performance Objective 1 & 2: Highly effective regulator and management of resources.

**DESIRABLE OUTCOME**

The majority of customer service calls can be answered by the customer service team in a timely fashion prior to the caller ceasing to wait in the call queue.

**PERFORMANCE INSIGHTS:**

- Q4 was the best performance in 2016 for the CAIT team, handling 13,129 out of 14,114 inbound calls offered to the service (93%).
- The significant increase in availability versus Q3 is partly linked to a 50% decrease in calls received by the team. Q3 is usually the busiest period of the year due to the seasonality of UK Dentist applications and the DCP ARF period.
- The 14,114 calls offered during Q4 is more in line with the teams’ business as usual expectations.
- There is a direct correlation between call volumes and the proportion of calls answered - during busy periods, callers are more likely to abandon their attempt to make a call due to the amount of time they need to wait for it to be answered.

**ACTUAL PERFORMANCE**

- **THIS PERIOD:** 93% Answered
- **PREVIOUS PERIOD:** 75% Answered

**PERFORMANCE INDICATOR: PI/REG/017 – Registration Applications Processed**

**PERFORMANCE INSIGHTS:**

- The drop in expected Registration levels from Q3 to Q4 is due to a decline in DCP registrations during Q4. The route fell 21% short of the 1,451 expected for the period.
- Incoming DCP registration volumes are the most variable of all routes and are more difficult to predict due to the lack of information available from awarding bodies regarding likely numbers of entrants to the profession.
- 2016 ended 5% below the 8,788 applications forecasted for the year, however, in total more income than forecast was collected.
- The biggest shortfall throughout the year was via the DCP Restoration route. A higher number of restorations were expected after the ARF period due to the introduction of indemnity and the anticipation that more DCPs would be removed from the register as a consequence.

**ACTUAL PERFORMANCE**

- **THIS PERIOD:** 95% To Budget
- **PREVIOUS PERIOD:** 98% To Budget

**PERFORMANCE INDICATOR:**

The proportion of all Registration staff reaching minimum acceptable productivity (MAP) targets.

**CORPORATE STRATEGY LINK**

Performance Objective 1 & 2: Highly effective regulator and management of resources.

**DESIRABLE OUTCOME**

Team member productivity is high, supporting wider objectives to process volumes of incoming work in a timely fashion.

**PERFORMANCE INSIGHTS:**

- All of the UK Registration team members met their relevant MAP during Q4. The productivity across the whole of the team is one of the major reasons for a 65% decrease (497 to 172) in live applications between the quarter start and end.
- One member of the UK Registration team remains on long-term absence so has been excluded from this quarter’s performance.
- Currently, MAPs are only reportable for the UK Registration area but development is ongoing to ensure a robust set of MAPs are live and monitored for both DCP and Dentist Casework teams throughout Q1 2017.
