HISTORY TAKING	Mini CEX CBD DOPS Patient Assessment Qu ISFE	iestionnaire		
The trainee will be able to elicit, record and interpret an accurate history from patients of any age within the scope of Oral Medicine practice				
CLINICAL EXAMINATION	Mini CEX DOPS Patient Assessment Qu	ıestionnaire		
The trainee will be able to perform an appropriate clinical examination on patients of any age within the scope of Oral Medicine practice				
INVESTIGATIONS	Mini CEX CBD ISFE	,		
The trainee will be able to select and request (and in some instances undertake) appropriate and relevant investigations within the scope of Oral Medicine practice.				
To be able to interpret and where necessary seek clarification on the meaning of a range of laboratory and imaging investigation results to inform subsequent patient care.				
PATIENT MANAGEMENT	Mini CEX CBD ISFE			

The trainee will be able to undertake specialist assessment and management of a patient of any age within the scope of Oral			
Medicine practice, in both an outpatient and inpatient hospital setting.			
PRESCRIBING AND THERAPEUTICS	CBD ISFE		
The trainee will be able to undertake safe and effective prescription of drugs.			
OPERATIVE INTERVENTIONS			
The trainee will be able to undertake safely and effectively, operative techniques:	Mini CEX DOPS		
As definitive management of localised benign disease; or			
To establish a tissue diagnosis, including where oral soft tissue malignancy is suspected.			
The trainee will be able to describe the appropriate application of operative techniques in other relevant situation	Mini CEX CBD ISFE		
ORAL AND SOFT TISSUES IN HEALTH	Mini CEX CBD ISFE		

SALIVARY GLANDS IN HEALTH	Mini CEX CBD ISFE		
to diagnose and manage viral, bacterial, fungal and other infections of the oral soft tissues.	Mi i OFW		
The trainee will be able	CBD ISFE		
ORAL SOFT TISSUE	Mini CEX		
The trainee will be able to investigate, diagnose and manage patients with oral soft tissue disease with a hypersensitivity basis.			
HYPERSENSITIVITY REACTIONS	Mini CEX CBD ISFE		
The trainee will be able to undertake specialist assessment and management of oral soft tissue disease.			
ORAL SOFT TISSUE DISEASE	Mini CEX CBD ISFE		
The trainee will be able to correlate health of the lips and oral soft tissues to disease states and use this insight to inform patient care.			
To provide the trainee with the knowledge of the structure and function in health of lips and oral soft tissues.			

The trainee will be able to describe the structure and function in health of salivary glands and saliva.			
The trainee will be able to correlate health of salivary gland tissues to disease states and use this insight to inform patient care.			
SALIVARY GLAND DISEASE	Mini CEX CBD ISFE		
The trainee will be able to diagnose and appropriately manage patients presenting with disorders of major and minor salivary glands			
NERVOUS SYSTEM IN HEALTH	Mini CEX CBD ISFE		
The trainee will be able to describe the structure and function in health of the nervous system.			
The trainee will be able to correlate health of the nervous system to disease states and use this insight to inform patient care.			
ORAL FACIAL PAIN	Mini CEX CBD ISFE		
The trainee will be able to diagnose and appropriately manage patients presenting with orofacial pain of odontogenic and nonodontogenic origin.			

The trainee will be able to diagnose and appropriately manage patients presenting with altered cranial nerve function related or unrelated to other neurological abnormalities. THE INTERFACE OF ORAL AND SYSTEMIC DISEASE The trainee will relate health and disease of orofacial tissues to other relevant body systems where appropriate. The trainee will be able to provide advice on medical disease to dental practitioners and patients and on specific oral implications of disease to medical practitioners. Development of management plan for chronic disease, including self-care and	NEUDOLOGICA:	M: : OFV

The trainee will be able to identify serious or incidental psychiatric morbidity in patients presenting with oral disease			
MEDICAL EMERGENCIES			
The trainee will be able to recognise, manage and where required provide basic and immediate life support for adult and paediatric medical emergencies, in line with guidelines from the UK Resuscitation Council	ISFE Simulator		
The trainee will be able to minimise risk of, recognise, assess and treat other acutely unwell adult and paediatric patients including simple faint, postoperative bleeding, hyperventilation, angina, myocardial infarction, acute asthma, anaphylaxis, diabetic emergencies, seizures and adrenal insufficiency	CBD Simulator
